

XML Code:

```
<?xml version="1.0" encoding="UTF-8"?>

<beans xmlns="http://www.springframework.org/schema/beans"
       xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
       xsi:schemaLocation="http://www.springframework.org/schema/beans
                           https://www.springframework.org/schema/beans/spring-beans.xsd">

    <!-- Define the SimpleDateFormat bean -->
    <bean id="dateFormat" class="java.text.SimpleDateFormat">
        <constructor-arg value="dd/MM/yyyy" />
    </bean>

</beans>
```

SpringLearnApplication.java:

```
package com.cognizant.spring_learn;

import org.slf4j.Logger;
import org.slf4j.LoggerFactory;
import org.springframework.boot.SpringApplication;
import org.springframework.boot.autoconfigure.SpringBootApplication;
import org.springframework.context.ApplicationContext;
import org.springframework.context.support.ClassPathXmlApplicationContext;

import java.text.ParseException;
import java.text.SimpleDateFormat;
import java.util.Date;

@SpringBootApplication
public class SpringLearnApplication {

    private static final Logger LOGGER =
        LoggerFactory.getLogger(SpringLearnApplication.class);

    public static void main(String[] args) {
        SpringApplication.run(SpringLearnApplication.class, args);
        LOGGER.info("Inside main method: SpringLearnApplication started successfully!");

        // Invoke the new method to test the XML Bean
        displayDate();
    }

    public static void displayDate() {
        LOGGER.info("START - displayDate()");
    }
}
```

```

        // 1. Create the ApplicationContext pointing to the XML file
        ApplicationContext context = new ClassPathXmlApplicationContext("date-
format.xml");

        // 2. Get the dateFormat bean
        SimpleDateFormat format = context.getBean("dateFormat",
SimpleDateFormat.class);

        try {
            // 3. Parse the string and display the result
            Date date = format.parse("31/12/2018");
            System.out.println("Parsed Date: " + date);
            LOGGER.info("Parsed Date output successfully.");
        } catch (ParseException e) {
            System.out.println("Error parsing the date: " + e.getMessage());
        }

        LOGGER.info("END - displayDate()");
    }
}

```

Output:

```

gLearnApplication : START - displayDate()
Parsed Date: Mon Dec 31 00:00:00 IST 2018
2026-07-11T10:44:01.850+05:30 INFO 10748 --- [spring-learn]
gLearnApplication : Parsed Date output successfully.
2026-07-11T10:44:01.851+05:30 INFO 10748 --- [spring-learn]

```
